PROFESSIONAL SUMMARY

Numerate analyst with an MSc in Business Management (Distinction), a BSc in Mathematics, and 3+ years of experience turning large datasets into decisions across supply chain, finance and retail. Works end-to-end data modelling and SQL/ Python analysis through to Tableau and Power BI dashboards and written insight with two published portfolio case studies. Strong statistical foundation, meticulous quality control, and a record of communicating clear, commercial findings to nontechnical stakeholders.

SKILLS

- **Data & Analysis:** SQL (MySQL), Python (pandas), data modelling (star schema), statistics (correlation, variance, control groups)
- **BI & Reporting:** Tableau, Power BI & DAX, Advanced Excel (pivot tables, Power Pivot, VBA), dashboard design, data storytelling
- **Systems & Governance:** Salesforce CRM, Google Analytics, Git, quality control, UK GDPR & DPA 2018 awareness

WORK EXPERIENCE

SWAROVSKI | Sales Consultant - Key Holder | May 2026 - Present | UK

- Oversee daily retail operations as a responsible key holder, including stock analysis, inventory management and replenishment, maintaining accurate operational records and flagging data quality issues to support service improvement.

JOHN LEWIS & PARTNERS | Customer Assistant | November 2025 – April 2026 | UK

- Maintained accurate Salesforce CRM records and conducted ad hoc commercial analysis on stock and sales data, delivering clear findings on trends and anomalies to team leaders and non-technical stakeholders while consistently meeting KPIs.

TRAVEL CHAPTER | Customer Service Advisor – Salesforce | July 2025 – September 2025 | UK

- Managed customer data in Salesforce CRM, ensuring accuracy and consistency across records and contributing to structured reporting that supported operational decision-making in a fast-paced contact centre.

COM1 UK (LOCARLA) | Data Research Analyst | June 2022 - July 2023 | India

- Analysed 10,000+ housing-sector tender and contract records using SQL and Advanced Excel, delivering structured client reporting that reduced reporting inefficiencies by ~15–20%.
- Built and maintained Power BI and Tableau dashboards and client-facing insight reports for 5+ cross-functional teams, applying correlation, trend and variance analysis to identify performance drivers across the contractor portfolio.
- Engaged directly with clients to scope reporting needs and upheld strict quality control across individual and team outputs.

UDIT INFRA WORLD Pvt. Ltd. | Operations Analyst | August 2019 - April 2022 | India

- Owned financial insight and reporting across 20+ concurrent infrastructure projects, applying standard deviation, correlation and control-group analysis to quantify risk driving a ~15% improvement in procurement efficiency.
- Strengthened quality control and reporting processes across finance and procurement workstreams, increasing data accuracy by ~25%, and translated complex financial data into clear recommendations for senior stakeholders.

EDUCATION

- **M.Sc. Business Management | University of East Anglia, UK | 2024 - 2025**
Key modules: Digital Marketing, Accounting, Corporate Finance, Management Analytics
- **B.Sc. Mathematics | Nagpur University, India | 2015 - 2018**
Key modules: Statistics, Algebra, Calculus

PROJECTS

- Crude Oil Supply Chain & Logistics Analytics — SQL · Python · Tableau · Excel
Designed a 9-table star schema over 24 months of supply chain data; analysed supplier OTIF reliability, delivery efficiency, cost and inventory health, delivering a Tableau dashboard and cost recommendations.
github.com/prachidabli-data/crude-oil-supply-chain-analytics
- The Riverside Kitchen — Restaurant Performance Analytics — Python · SQL · Tableau · Excel
Analysed 32,916 orders across 18 months, linking demand (menu, customers, seasonality) to supply (suppliers, waste); menu-engineering analysis found the least reliable supplier held the largest spend.
